WHY DO CHILDREN NEED FLUORIDE?

Our mouths contain **BACTERIA**

That bacteria combines with sugars in the foods we eat and the beverages we drink and produces...

= **ACID**

The acid that is produced harms tooth enamel and damages teeth

FLUORIDE PROTECTS TEETH BY MAKING THEM MORE RESISTANT TO ACID

Get Your Fluoride Here!

-  Drink fluoridated water
-  Brush with the right amount of fluoridated toothpaste
-  Talk to your dentist or doctor about fluoride treatments
