

Amendment to Replacement MMIS

Request for Information #4

July 19, 2011

South Carolina Department of Health and Human Services (SCDHHS) published Request for Information (RFI) #4 on June 30 requesting feedback on its Replacement Medicaid Management Information System (MMIS) draft Request for Proposals (RFP).

At the Vendor session on July 12, participants requested that all written Vendor feedback be published without attribution to the source organization, and the State agreed to this approach in the interest of promoting the free exchange of ideas and encouraging written comments.

This amendment to RFI #4 provides clarification on the State's planned approach.

The State will publish all responses in the format provided to it. Thus, if an organization prefers to have its feedback published without attribution, such feedback should be tendered without indentifying information, such as the organization's letterhead or mast head, on any page of the actual feedback. Cover letters from respondents will not be published, and feedback included in such letters will not be answered or included in the final published summary.

The general outline of the final document that will be published by the State is planned to be as follows:

- The State's commentary on any general feedback not associated with one of the RFI questions or the table containing comments, suggestions, and questions;
- The State's commentary on responses to the questions posed in the RFI;
- A table containing the State's responses to comments, suggestions, and questions provided in tabular form by the respondents;
- Any final commentary by the State;
- Each response received by the State (cover letters excepted) in random order.

The State notes that the South Carolina Freedom of Information Act will apply to all Vendor submissions.

All other guidance from RFI #4 remains the same.

Thank you for your interest in the State of South Carolina
