

Using QIDA for your QI work with QTIP

What your first few months is QTIP will look like and how we use data

To do list

Learning
Collaborative:

Schedule your first QTIP team meeting

Determine team rolls for scribe/record keeper and QIDA enterer.

What will your first month in QTIP look like?

- Take a minute when you get back to your office to mentally digest and share with the rest of the staff what you learned.
- Use your first team meeting to do a few chart audits together using QIDA.
 - You may find you have differing interpretations of the questions
 - You may find you locating the information in your EMR isn't as standard as you thought
 - Use your first chart audit as your first PDSA:
 - Plan or Predict how you think it will go
 - Do the audit as a team, try different configurations of workflow.
 - Study how it went, How long did it take per chart?

WRITE IT ALL DOWN!

After your first audit....

- Meet with your team and compare your practice to the state average.
- Use this information to identify where your biggest opportunities are for improvement.
- Chose if your first QI project will be the implementation of a new process, or a systemic improvement of an existing process.

New Process:

- Reach out to other QTIP practices to see how they got started, (Laura can help point you in the right direction)
- Do you own research
- Write an AIM statement

Existing Process:

- Take a deeper dive into the baseline measure; entire patient population, provider by provider. Slice it and dice it how ever it makes sense to your practice.
- Reach out to other practices to see how they do it.
- Write and AIM statement

The Difference between QIDA Data and PDSA Data

QIDA Run charts

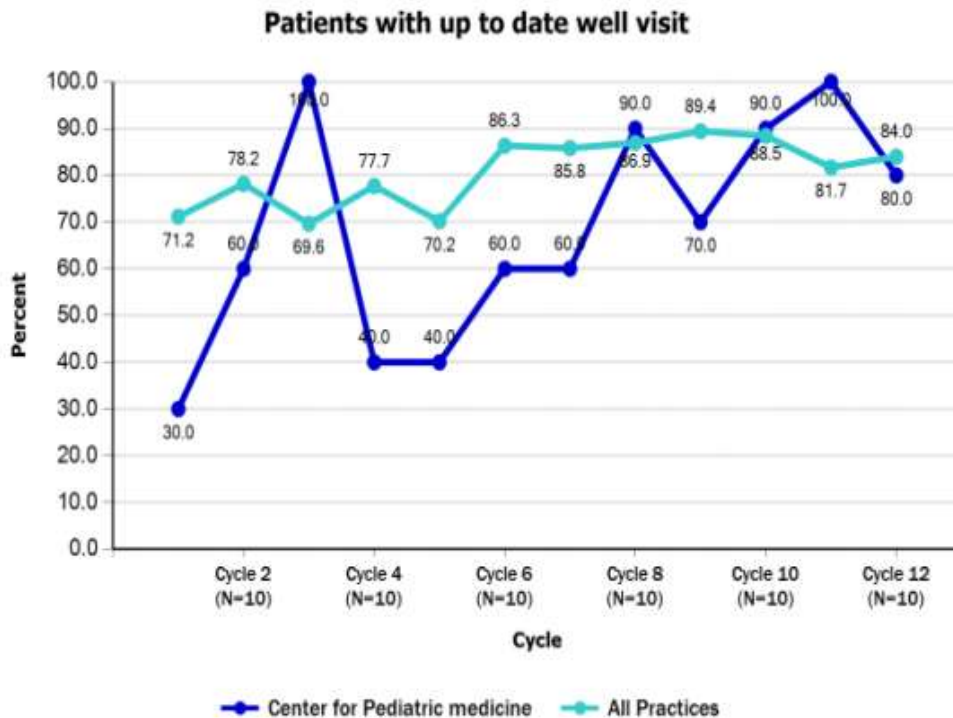

- 20+ Measures
- Monthly measurement only
- 2 age specific topic areas
- Quantitative measures only
- QTIP directed
- Option to answer “Not a practice priority” when you would show 0s across the board and are not actively working on the measure as a QI initiative.

PDSA Data

- 1 measure at a time
- Daily, weekly, collection
- Intense focus on one topic area
- Quantitative and qualitative measures
- Practice directed

Comparison Cont'd

QIDA

PDSA Data

- 2 year olds seen the week of 1/15: 15
- Fluoride Varnish Done on 2y/o week of 1/15: 7/15
- Patient calls to complain about FV charge: 2, 1 happy about the service, just unprepared to pay. 1 Very unhappy about the charge.

What I expect to see when I come for a site visit

Complete QIDA entry for that month, if we are scheduled for a site visit on the 11th, but QIDA is not due until the 15th please try to have your data in and “closed” before the site visit.

An up to date PDSA log, use what ever method works for you. Make sure this includes your PDSA Data

An up to date QI meeting log, when did you meet, what was discussed, what is meant to happen before the next meeting, date for next meeting.
