

# OFFICE MEDICAL EMERGENCY PREPAREDNESS

EASTER PENNINGTON, MD

QTIP Learning Collaborative August 10, 2019

# **OUR CLINICS**

**Center for Pediatric Medicine – Main** 

#### **Center for Pediatric Medicine – West**

**North Greenville Outpatient Center** 

### **IMPETUS FOR IMPROVEMENT**

- Office emergency experiences
  - Seizures
  - Respiratory Distress
- Grand Rounds Regarding Office Emergencies

#### POLICY STATEMENT

Preparation for Emergencies in the Offices of Pediatricians and Pediatric Primary Care Providers

Committee on Pediatric Emergency Medicine

Organizational Principles to Guide and Define the Child Health Care System and/or Improve the Health of All Children

### BEGINNING OF CHANGE

- Identify What does your clinic need?
  - Depends on location of clinic, patient population, distance for EMS, physician training, available staff
  - Multidisciplinary review meeting
    - Physicians
    - Nurses
    - Front office staff
- Implement
- Review

### **IDENTIFY**

- Airway box
- Medication box
- Documentation of event
- **■** Front Office Protocols
- Staff training
  - Locating equipment
  - 02 flow rate requirements
  - Mock Emergencies/Walkthroughs

### **IMPLEMENT**

- Airway Box
  - Color coding with Broselow tape into infant, child, adult equipment
  - Alternate Airways (NPAs, OPAs)
  - Addition of Magill forceps
- Medication box
  - Organized medications in a "pick up and go" box
    - Box contains: epi kit, dexamethasone, benadryl, narcan, albuterol, glucocon, instaglucose gel,
    - +/- AED (benzodiazepine)
- Documentation
  - "Code sheet" to be used to record during the event and scanned into Epic
  - Debrief after event with documentation
- Front Office Protocols
  - Updated office policy for urgent/emergent office issues for expected workflow
  - Front office emergency reference card
- Staff Training
  - Locating Equipment
    - Emergency medical supply lists placed in workrooms, nursing stations and at both respiratory boxes
  - 02 flow rate knowledge gap
    - Easy to read information placed in top of airway box
    - Nursing update given during nursing meeting
  - Faculty Development session
- Mock emergencies with all staff done quarterly

### **REVIEW**

- Reviewed after implementation with faculty/staff
- Review of in-office emergencies
- Review after each mock emergency

# AIRWAY BOX

- Brosel
- Suction
- Individ
  - Nasa
  - NRB
  - Remo
- Oral Ai
- Nasopl
- Code S
- Bag Va beside
- No LM

# **EME**

- Instagluce
- Glucagon
- Epinephrii
  - (1 mg/1 ml)
- Narcan IM
- Decadron
- Benadryl
- Albuterol

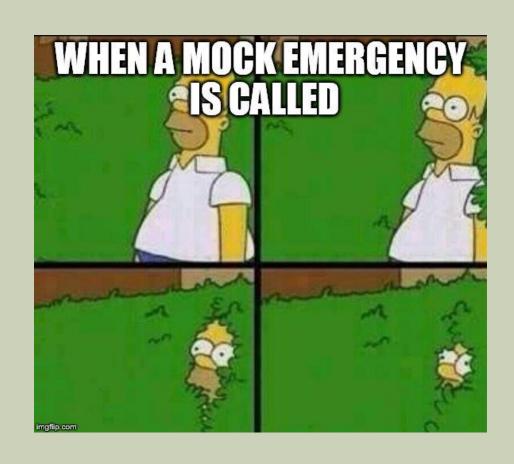

# BOX

### **MOCK CODE GOALS**

- Staff members know roles in an emergency situation and how to manage common pediatric office emergencies
- Staff members know location of and how to use emergency medical supplies
- Staff members know how to call 911 and how to give effective patient check-out
- Staff members know how to document details of code in EHR

### **MOCK EMERGENCIES**

- They should fit your needs for your clinic and the objectives you are trying to cover!
  - Downtown office simulation
  - West office walkthrough emergencies
- Make your patients aware what is going on!
- It can be as simple or as complex as you desire.

#### Request for Acute Visit:

- If parent mentions any of the conditions listed in current Urgent/Emergent protocol, or you observe them in the patient personally, that procedure will be followed in lieu of process below.
  - Urgent/Emergent protocol can be found at the end of this document
- This procedure may be modified during season of high volume, low appointment availability to include rapid assessment by nurse for acuity of illness before disposition decision is made.

#### URGENT/EMERGENT PROTOCOL:

- Urgent: Create a telephone encounter, marking it high priority and call the triage nurse
  - o Head trauma -bumped head, profuse bleeding
  - o Possible broken bones (Triage will forward encounter to SW for notification)
  - Fever of 103 or higher (Child of any age)
  - Bloody vomit or diarrhea
  - Not breathing properly
  - Chest pain (especially if accompanied with shortness of breath)
  - Dehydration
  - o G tubes and tracheotomy patients (If stated by the parent)
- Emergent: If patient has any of the symptoms below that may signal an emergency, dial Feature 6-3-0 and state "Medical Alert Jr"

#### and location (example: Lobby)

- Labored/noisy/wheezing breathing
- o Blue or pale color
- Loss of consciousness (common terms: unconscious, fainted, passed out)
- Seizure
- o Head trauma followed by vomiting
- Excessive or uncontrolled bleeding
- Burns (EXCEPTION: sunburns send telephone encounter to social worker)

### Center for Pediatric Medicine Emergency Medical Supplies

Back hall near Case Management Office

#### Oxygen Tanks

Side A: Closet between Room 9 and Dr. Saul's office

Side B: near airway box at interpreter station

Emergency Medicines, Epipen Jr./Epipen and Pulse Oximetry

All nursing stations

Airway Boxes and Suction Machines

Side A: In cubby outside Room 10

Side B: Far cabinet at interpreter station

#### Glucometer:

Located in Main Lab (front), second desk drawer on left side

#### Eye Wash

Side A - Ready room sink next to back hall nursing station

Side B - Medical Director office
