QTIP
Quality through
Technology and Innovation in Pediatrics

THE MUST HAVE SLIDE:

I have no conflicts to discuss

THANK YOU FOR SUBMITTING YOUR DATA
MONTHLY 10 CHART AUDITS

4 groups of patients that we audit. Additional tobacco questions
2 groups each month that alternate with each other

- Group 1: Last 10 patients from 6 months and 9 months of age seen (for sick and well visits)
- Group 2: Last 10 patients seen from 24 and 30 months of age (sick and well visits)
- Group 3: Last 10 patients from 13 to 18 yrs. Of age (sick and well visits)
- Group 4: Last 10 patients seen with moderate to severe asthma from 5 to 18 yrs of age

QTIP
Quality through
Technology and Innovation in Pediatrics

NEW QUESTIONS

Questions about tobacco exposure
Redoing questions about access to better reflect need for knowing if patient attribution is correct

QTIP
Quality through
Technology and Innovation in Pediatrics

MOC PART IV CREDIT

Your QIDA data provides documentation for Part IV QI

If you share your QIDA data monthly, either by posting, sharing a printed copy, presenting at staff meetings, etc. with all of the pediatricians in your office, and they are allowed to comment and make suggestions, they automatically qualify for MOC Part IV credit even though the QI team did the work

Right now QIDA measures data in a variety of areas, so I can conceivably give credit for all areas you submit data to QIDA... Well child care, adolescent care, behavioral health, oral health, obesity, developmental screening

You must be a member of the South Carolina Chapter of the AAP as they provide credit as a membership service. There is no cost at present for SC AAP members

MOC PART IV CREDIT

The QTIP chief clinician at each practice is responsible for certifying that the pediatricians needing credit were aware of their office QIDA data and the related QI projects over the year and were present when the projects were discussed or given opportunity to respond in writing

ABP wants QI efforts coordinated across practices. They would rather not have different practitioners in the same practice doing unrelated work. They want to see office-wide QI activity. They do allow me to give credit for each of the individual topics in our portfolio.

MOC PART IV

Get your attestation forms to me each year by Thanksgiving

To get credit, and we'd like to give it for everyone in your practice who qualifies, download the appropriate attestation forms from the ABP website for each applicant, they sign it, you sign it, and you scan and send it to me farushton@gmail.com so I can enter credit

The correct attestation forms should be under American Academy of Pediatrics South Carolina Chapter

E-mail me questions

8/2

NEXT STEPS 2017

Fill out your evaluations

Get your practice team together and complete your next steps forms

Let Françoise or Laura know if you visit date won't work

Think about smoke exposure and where your opportunities are

What is the best way to document your interventions in PDSA cycle format?

Think about what you learned about tobacco? What kind of brief intervention? Quit line? Nicotine replacement? Would you consider testing with PDSA cycle format

Continue to think about ways you can incorporate family input into your QI work

Continue to think about your first steps in thinking through care coordination in your office

SUBMIT YOUR MOC ATTESTATION forms to Françoise (FEERushton@gmail.com). Don't forget to blog.

We love entries into the PDSA cycle log and QI minutes log

Continue to give us QIDA data

Thank you
