

2019 Teen QIDA Survey

Teens ages 13-18

1. *Did the patient have a well visit in the past 12 months?*
What Counts as a yes: A well child visit within the past year recorded in the chart. If the chart being audited was last seen for a well child visit, that visit counts. Sports physicals alone do not count as a well child visit.
2. *Is the provider listed in the EMR the provider who saw the patient for the last well visit?*
What counts as a yes: If the doctor listed as primary in the medical record is the one who did the last well child visit, the answer is yes.
3. *Is the patient up to date on vaccines appropriate for the patient's age?*
What counts as a yes: Documentation of Meningococcal A, TDAP and HPV (at least 1 dose of HPV)
4. *Is there documentation in the record that the patient has completed the HPV vaccine series?*
What counts as a yes: Documentation that the patient has received a completed series.
5. *Is the patient's BMI over the 85th percentile?*
 - a. *Is there documentation that weight counseling was provided to the family?*
What counts as a yes: Documentation that the patients was given guidance on healthy eating and exercise habits.
6. *Was the patient screened for tobacco use and/or exposure in the last year?*
What counts as a yes: Any evidence of tobacco use screening for both the family and a patient. This questions should be asked in such a way that any tobacco exposure is recorded, including use of vaporizers and e-cigarettes.
 - a. *Was the screen positive for tobacco use/exposure?*
 - b. *Was the family given advice to quit?*
What counts as a yes: documentation in the medical record that the family was educated on the hazards to the patients health from 1st hand, 2nd hand, and 3rd hand tobacco exposure.
 - c. *Were cessation strategies discussed? (Including referral to the SC quit line)*
What counts as a yes: Documentation that the provider educated the family on cessation strategies which could include prescribing OTC nicotine replacements drugs and/or referral to the Quitline.
7. *Is there documentation that safe sex was discussed with the patient?*
What counts as a yes: documentation that a discussion was with the patient about safe sex which could include contraceptive options, discussion of STI risks, etc.
 - a. *Was the patient screened for HIV?*
 - b. *Was the patient screened for Chlamydia?*
 - c. *was the patient screened for other STI's?*
What counts as a yes (7abc): documentation in the chart that the patient was given the applicable screen.
8. *Is there documentation in the medical record indicating a behavioral health screen was performed with in the past year?*
What counts as a yes: A copy of a screen or notation one was done in the chart within the past year. PHQ2 would count as well as the PSC or PHQ9 screens or other screens selected by the practice.
 - a. *Was the screen positive?*
 - b. *Is there a plan documented in the chart that addresses the issue?*
What counts as a yes: Documentation in the chart that the issue was addressed either in the office, referral to a specialist or other means.
